

# HOLISTIC DEMENTIA CERTIFICATE

TO PROMOTE EFFECTIVE CARE FOR PATIENTS WITH DEMENTIA AND SUPPORT THOSE THAT MATTER TO THEM FROM DIAGNOSIS TO BEREAVEMENT.

The aim of the course is to promote effective care for patients with dementia and support those that matter to them from diagnosis to bereavement.

## **Who would benefit:**

Nurses, doctors, allied health professionals, social workers and chaplains working in secondary and primary care settings and contributing to the palliative care of adults

## **Course Content:**

The certificate is an accessible, practical, informative and concise programme covering the basic principles of different dementia diagnoses and palliative care.

The contents are aimed at the areas of palliative dementia care that often cause the greatest concerns to health professionals and to patients. These include symptom management, dilemmas, communication issues, and managing challenging behavioural and psychological symptoms. Through the handbook, case histories and supporting video materials the course is focused on helping busy clinicians to increase the specific knowledge and skills necessary to better tend patients with both dementia and palliative needs, irrespective of setting.
